

GEOTECHNICS PAGANI CPT RIG

TG63-150

The Pagani TG63-150 machine is a compact rubber track mounted rig that has a 150 kN pushing capacity. It is suitable for challenging terrains, from wetland areas to hard to access residential sites. It has independently powered hydraulic anchoring systems that ensure effective counter force and reduce setup time.

We can provide you with:

- **Piezcone Penetration Testing (CPTu)**
- 30 m maximum depth
- **Dynamic Probe Super Heavy Testing (DPSH)**
- 20 m maximum depth
- **DS-44 sampling**
- 5 m maximum depth (1 m sample length is sealed in plastic liners)
- **Shelby push tube sampling**
- 5 m maximum depth (500 mm sample length in steel liners)

CPT maximum thrust capacity: 150 kN

For enquiries on the Pagani Rig, contact our Auckland branch.
